

HILS

N O R D

ON.
life

A life in balance
between nature
and the city.

A woman with long, wavy hair, wearing a white, long-sleeved, open-back dress, stands in a field of tall, golden grass. She is holding a wide-brimmed hat in her right hand and reaching out with her left hand towards the grass. The sun is low on the horizon, creating a warm, golden glow and a lens flare effect. The sky is a pale, hazy yellow.

A balanced life means feeling connected,
safe, and respected by yourself, by nature,
and by the city you call home.

Life ON.

*LIFE ON. AT
HILS NORD*

A new story of “home” begins in a new location.

HILS Nord is where every day shows you what it truly means to live well, balancing energy and calm, city life and nature. Here, in the north of Bucharest, on the shores of Lake Șaulei, you can switch life ON and leave the noise behind.

An aerial photograph of the HILS Nord residential complex. The complex consists of several long, multi-story apartment buildings with light-colored facades and numerous balconies. The buildings are arranged in a U-shape around a central green area with trees and a paved walkway. In the foreground, there is a large body of water, possibly a lake or river, with a paved path along its edge. The background shows a dense urban area with many smaller buildings and trees under a clear sky.

ABOUT HILS NORD

HILS Nord is the newest chapter in the HILS Development story. A sustainable residential project designed to meet the needs of a modern community.

Designed as a complete neighborhood, with fully integrated amenities, HILS Nord brings together modern urban comfort and the serenity of nature.

A place where neighbors become friends, children grow up safely, and days are defined by simple moments: a coffee on the terrace, a sunset by the lake, or a relaxing walk at the end of the day.

For us, "home" means more than an address. It means belonging, balance and future. That's why HILS Nord, a Green Homes pre-certified project, is built using sustainable materials and energy-efficient solutions for a greener, more durable future.

Set across approximately 10 hectares, this mixed-use development takes shape through walkways, green spaces, an amphitheater-style park, an urban park, relaxation areas, children's playgrounds, and an environment designed for social interaction.

HILS Nord is conceived as a neighborhood for everyone, offering exclusive amenities within the complex: a coffee shop, retail spaces, and fitness & SPA facilities.

LOCATION

You are just a few minutes away from everything that matters to you.
Direct access to the A3 Highway.

 **15 minutes by car**
Henri Coandă International Airport

 **1 minute by car**

HILS Nord rises in the north of Bucharest, on the quiet shores of Lake Șaulei, where the energy of the city meets the harmony of nature.

Ideally positioned, with direct access to the A3 Highway, the project offers seamless connectivity to the capital's main business hub.

AMENITIES

HILS Nord, a neighborhood where relaxation is part of your lifestyle, right at your doorstep:

SPA & pool

Lakeside promenade

Retail spaces

Green relaxation areas with urban park

The green spaces extend over more than 4 hectares and are designed according to Xeriscaping principles, using plants that remain green throughout the season. Rainwater recycling systems, urban gardens, and relaxation areas complete a balanced and sustainable living experience.

*ARCHITECTURE
& DESIGN*

HILS

HILS Nord features a stepped architectural design, with building heights ranging from 2 to 6, and up to 11 floors.

The project consists of 11 residential buildings and 1 building dedicated to commercial spaces. With heights ranging from 2 to 11 levels, they are harmoniously integrated to create an elegant and balanced presence within the landscape.

Ventilated façades, subtle volume contrasts, and fluid lines create a contemporary aesthetic and a refined visual identity.

FINISHES

Design, comfort, and safety. Part of your everyday standard of living at HILS Nord.

Underfloor heating delivers both comfort and safety, meeting European standards. Easy to control and practical at every step, it is the modern solution that replaces traditional radiators with an efficient system designed for year-round comfort.

For additional comfort, the apartments are equipped with air-to-water heat pumps, a modern and sustainable energy source that maintains the perfect indoor climate, regardless of the weather.

The electrical network is designed for modern living, with intelligent and efficient circuits, seamlessly integrated to meet your needs.

Sanitary installations are selected from top-tier manufacturers.

A high standard of finishes reflects the comfort of home.

Carefully selected to create a harmonious space, SPC flooring in natural tones and ceramic tiles from top manufacturers bring a refined, minimalist touch to the apartment's interior.

Triple-glazed PVC window frames provide thermal and acoustic comfort, while allowing natural light to flow in.

Interior doors with a modern design integrate seamlessly into the overall ambiance.

In the bathrooms, sanitary fittings with clean lines, modern fixtures, and suspended furniture are designed to offer a complete experience of comfort and premium design.

APARTMENT TYPES

Garden Apartment

Regardless of the chosen layout, double studio, 1-bedroom or 2-bedroom apartments, interior comfort extends outdoors, into your own private garden, a space for relaxation and freedom.

Double Studio

A practical and cozy apartment, thoughtfully designed for your comfort and needs. An ideal choice for the investor in you.

1-bedroom Apartment

A generous space for couples or active individuals who want to live close to nature, while still enjoying urban amenities.

1-bedroom Apartment + Office

Each space is thoughtfully designed for efficiency and modern living, offering everyday comfort and the freedom to personalize your home to your needs. An apartment tailored to your lifestyle, whether you work from home or simply want more personal space.

Duplex with 2 or 4 bedrooms

Life looks better from above. The 2- and 4-bedroom duplexes at HILS Nord redefine urban comfort, combining elegant spaces with a refined lifestyle, in a premium community where you can enjoy peace and nature.

SUSTAINABILITY

Sustainability is part of HILS Nord's DNA: photovoltaic panels powering common areas, roofs treated with reflective membranes to reduce the "urban heat island" effect, and electric vehicle charging stations.

All these solutions deliver superior energy efficiency, real benefits for residents, and a positive impact on the environment.

HILS Nord is designed as a complete living experience, for people and for nature alike. The project meets nZEB standards, is fully electric, and is Green Homes certified, integrating green solutions for a modern, sustainable lifestyle:

Photovoltaic panels / 20 kWp

Underfloor heating

Air-to-water heat pumps

Electric parking spaces

Extensive green areas

Playgrounds

Relaxation areas

We believe urban living should exist in harmony with nature, with time, and with the people around us. That's why we don't just build buildings, we create living ecosystems.

PAYMENT OPTIONS

Purchase options are tailored to your lifestyle, your long-term plans, and how you envision your future at home.

OWN FUNDS

Together, we build the future. We offer a wide range of apartments and personalized options based on your down payment.

BANK LOANS

The process of buying an apartment should be simple and adapted to your needs. At HILS, we identified this need and acted accordingly: we created an in-house credit brokerage division to support you, with no additional effort required from your side.

DEVELOPER INSTALLMENTS

We support buyers with a flexible installment system for up to 7 years, making the purchasing process easier and more manageable..

An aerial night photograph of a city. In the foreground, several modern, multi-story apartment buildings with dark roofs and lit windows are visible. In the background, a commercial district is illuminated with streetlights and building lights, including a large parking lot and a building with a prominent red sign. The sky is a deep twilight blue.

*HILS DEVELOPMENT
PHILOSOPHY*

For over 20 years, we've been building communities. From the eastern side of Bucharest, towards new directions.

HILS Development represents the experience gained over more than 20 years of real estate development, under the leadership of founder Ionuț Negoită.

We believe in the urban development of the Capital and in the well-being of the communities we create. Each year, we build approximately 1,000 homes that transform Bucharest's landscape into a symbol of modern, refined living.

"After two decades of development in the eastern part of the Capital, the natural next step is expansion towards the north. We return to an area with exceptional potential, where we built our first projects 20 years ago, with the same vision of delivering quality, durable homes, well integrated into the city. HILS Nord marks the continuation of a story of growth and consolidation, in a Bucharest that is developing in a balanced way."

*Ionuț Negoită,
Founder & CEO, HILS Development*

HILS DEVELOPMENT PHILOSOPHY

Our mission has always been simple: to create quality homes, well connected to the city and designed around real needs. Every promise we made, we delivered.

COMPLETED PROJECTS:

HILS Pallady: The first SOLD OUT project in the HILS Development portfolio, located just 50 meters from Anghel Saligny metro station.

HILS Brauner: Home is where communities grow. Over 2,500 people now live in HILS Brauner, our most recent sold out project.

HILS Republica: Phase 1 of the largest mixed-use urban regeneration project in eastern Bucharest is now complete, and the first residents have already moved into their new "home."

HILS Splai: A fully completed and sold residential complex, set along the Dâmbovița River, offering a quieter setting away from the busy city environment.

HILS BRAUNER

HILS PALLADY

TWO MORE DEVELOPMENTS
ARE GETTING READY TO
BECOME HOME FOR FUTURE

HILS Sunrise: An nZEB development, Green Homes pre-certified, designed for a sustainable lifestyle, an oasis of calm, just 3 minutes from Anghel Saligny metro station.

HILS Titanium: A place designed for people. A project built for the community. Located in a quiet area, yet only 5 minutes from Nicolae Teclu metro station.

We started in the eastern part of Bucharest and are moving towards new directions. First stop: the northern area of the Capital.
